Puna de Atacama: 6 x 6000 meters
21 days

Mountaineering expedition to six mountains over six thousand meters, placed in the Puna de Atacama high plateau, Chile. Although their normal routes are not difficult, altitude is a serious hazard that should not to be underestimated. The very low percentage of humidity in the air in this part of the world makes any ascend in the Puna de Atacama a real challenge. So a very good acclimatization phase should be done at the beginning of the expedition, to have larger chances of reaching our main six goals.
